Listings Overview

Airbnb has a total of 92,360 listings across 5 cities and 195 neighborhoods, with Early Winter showing a clear seasonal peak — 70,000+ listings were registered in this period alone. Cities like Roma and Firenze dominate in terms of volume.

Entire homes account for the majority of listings (~73K), followed by Private rooms (~18K). The least represented type is Shared rooms, suggesting that travelers prefer more private spaces. The distribution by neighborhood also shows that urban centers (e.g., Centro Storico) attract higher listing density.

Why it matters:

Hosts and Airbnb can focus marketing and pricing strategies more effectively during winter months and prioritize entire-home experiences for better profitability.

Pricing Insights

The average listing price is €160, with a median of €105, indicating a skew toward affordable options. However, Entire homes command the highest average price at €173, while Shared rooms remain budget-friendly (~€81).

The top 5 most expensive listings are all in Firenze and Milano, priced above €88,000, though these are likely luxury or mispriced outliers.

A plot of Price vs. Rating suggests there is no strong correlation between high prices and high ratings — guests value experience over price.

Why it matters:

Hosts can improve revenue by adjusting prices around property type rather than relying on premium pricing to imply quality.

Host Insights

Only 31% of listings are managed by Superhosts, while 69% are regular hosts. Interestingly, Superhosts charge slightly less (€155 avg.) than regular hosts (€162), but receive higher average ratings (4.86 vs. 4.64).

The top 5 hosts manage more than 3,500 listings each, concentrated in Roma and Firenze, showing high professionalization in certain markets.

Why it matters:

Airbnb can promote Superhost properties as more reliable and better-rated. Regular hosts may benefit from guidance on service improvement to match Superhost standards.

Rating & Review Analysis

The average rating across all listings is 4.71, indicating strong guest satisfaction.

When broken down:

- Cleanliness: 4.73
- Location: 4.73
- Value for Money: 4.62

Entire homes and Private rooms score highest in average ratings (4.7), while Shared rooms score slightly lower (~4.5).

In terms of review activity, Entire homes receive the most reviews per month (~1.85), followed by Shared and Private rooms.

Why it matters:

High satisfaction levels can be leveraged in marketing, and listings with fewer reviews may need visibility boosts to gain guest trust.

Amenities & Property Features

Among all listings:

- 66K are 1-bedroom, 21K are 2-bedroom, and 5K have 3+ bedrooms
- 87K listings offer private bathrooms, while 5,800+ have shared bathrooms
- 47,000+ listings can accommodate 4+ guests

Entire homes not only charge more but also offer more capacity and better amenities — aligning with traveler preference for space and privacy.

 **Why it matters:**

Airbnb can guide new hosts to prioritize private amenities and 1–2 bedroom setups to match demand and maximize bookings.

Conclusion

Airbnb's data reveals valuable operational and strategic levers. Winter is the prime season, private and entire-home listings lead in popularity and satisfaction, and Superhost designation correlates strongly with better guest experiences.

Price is not the key driver of guest satisfaction — amenities, cleanliness, and host professionalism play a more important role. This insight empowers Airbnb to refine their platform recommendations, highlight top-performing hosts, and help property owners optimize offerings to boost revenue and reputation.
