

OLIST E_COMMERCE ANALYSIS

Prepared By
Ravichandran Sathish Kumar
February 2025

Executive Summary

- This analysis of Olist's e-commerce dataset highlights sales, customer, payment, logistics, and product performance across thousands of transactions. The dashboards uncover key business patterns and areas of improvement.
- Key Findings:
 - Sales Performance → Total sales of 15.8M across ~99k orders; strong seasonality with peaks in May and dips in September/December.
 - Customer Insights → Over 96k customers, but only 3k are repeat buyers; retention remains a major challenge.
 - Payments → Credit cards dominate (78%) with high reliance on installments (51.5% of orders).
 - Logistics → Delivery success is high (91.9% on time), but some states (Alagoas, Maranhão) suffer late deliveries above 20%.
 - Products & Sellers → Revenue is concentrated in a few top categories (Health & Beauty, Watches, Bed & Bath); top 5 categories contribute over 60% of sales.

Overview

This project analyzes e-commerce sales data across multiple dimensions to uncover trends in customer behavior, payment patterns, delivery performance, and product performance.

The dashboards provide actionable insights to improve sales growth, customer loyalty, operational efficiency, and logistics strategy.

Dashboards Covered:

1. Sales Overview
2. Finance & Payments
3. Customer Insights
4. Logistics & Delivery Performance
5. Product & Seller Performance
6. Conclusion & Recommendations

product_category_name

payment_type

seller_state

Average Order Value by Product Category

Seller Performance by State

Key Insights

- Total Products Sold: 32.9k
- Top Product Category: Health & Beauty (1.45M revenue, 9.4k orders)
- Top 5 product categories contribute ~60% of overall revenue, indicating dependency risk
- High AOV products: PCs (\$1.29k), House Pastals Oven & Café (\$669), Electricres (\$530)
- Sellers are globally spread, but sales concentration is visible among a few strong categories and states

Conclusion

The e-commerce business demonstrates strong sales volume and broad product coverage, but there are critical challenges:

- Revenue concentration in a few product categories and sellers
- Low customer loyalty, with most being one-time buyers
- Regional delivery inefficiencies, particularly in certain states
- Heavy reliance on credit card payments and installments

Recommendations

1. Boost Customer Retention

- Launch loyalty programs, cashback offers, and personalized promotions
- Encourage repeat purchases with bundled deals or referral benefits

2. Optimize Logistics Performance

- Strengthen last-mile delivery in late-delivery states (Alagoas, Maranhão)
- Partner with local couriers for faster regional coverage

3. Leverage Payment Insights

- Promote larger basket sizes by highlighting installment flexibility
- Introduce promotional financing options for premium categories

4.

- Diversify Product Portfolio
 - Reduce dependency on top 5 categories by investing in underperforming but emerging categories
 - Support niche sellers to expand variety and attract new customers
- Seasonal Campaigns
 - Address dips in sales months (e.g., September, December) with discounts, flash sales, or targeted campaigns
